SUMMARY

Lead Product Designer with 13+ years experience including 3 years of managing teams. Specializing in platform and ecosystem design, with deep expertise in platform, developer experience, extensibility, and dev tools. Proven track record of driving business impact at scale - delivered 1000+ Forge apps, growing Jira cloud app availability from 9% to 83%, and transformed Atlassian Marketplace with double-digit growth across key metrics. Currently leading AI Native design transformation of Atlassian, having trained 30+ designers on AI prototyping and AI assisted workflows. Strategic leader who partners with product and engineering in leadership triads to influence platform-level decisions and drive measurable outcomes.

EXPERIENCE

Atlassian

Lead Product Designer

Platform· September 2025 – September 2026

- Lead CX strategy to build platform infrastructure and performance monitoring tools for enterprises
- Leading AI-Native design transformation by training 30+ designers on AI-assisted workflows and AI prototyping
- Created internal experimentation platform with 15+ AI projects shared, enabling peer-to-peer learning across design organization

Experience Design Manager

Data Center, Ecosystem & Marketplace · Apr 2023 – Mar 2025

- Led CX strategy for Ecosystem and Marketplace teams which drove company-level cloud transformation goals affecting 10M+ paid cloud seats. Reached an important milestone of 1000 apps built on the Forge platform within 3 years.
- Led 4 pricing initiatives (App Editions, Bundles, Multi-Instance Licensing, Partner Release) for Atlassian Marketplace which led to 25+ apps adopting advanced editions in the first 3 months
- Transformed content design operations achieving an hour saved per release note and 50% faster off-cycle requests using AI-assisted workflows
- Drove the Aether Project to modernize Atlassian Marketplace, boosting app conversions by 13%, install clicks by 10%, and homepage visits by 105%, while improving accessibility, SEO, and platform scalability

Senior Product Designer

Forge Ecosystem Platform · Apr 2020 – Mar 2023

- Led a 3-year platform extensibility strategy from inception, growing Jira cloud app availability from 9% to 83% - enabling 189 of the top 200 marketplace apps to migrate and unblocking millions of enterprise customers from moving to cloud
- Delivered product vision by designing 30+ Jira Forge modules, including the most popular modules: UI modifications and Forge Custom Fields that unblocked marketplace partners to create their apps for Jira Cloud.

Product Designer

Server and Data Center Products ·Apr 2016 – Apr 2020

- Improved Jira boards performance by achieving less than 3 second load times; project featured as case study in Nielsen Norman Group's UX Metrics and ROI report
- Designed Archiving feature as first Data Center-only capability, which proved the hypothesis for enterprise-exclusive features
- Designed and shipped several improvements for various Atlassian products like Jira Server, Data Center platform, Bamboo CI/CD, Fisheye, and Crucible

BitChemy Ventures

Senior Product Designer | Sep 2013 – Sep 2015

- Led product design for venture portfolio companies across fintech, logistics, and productivity software
- Designed ERP system for Kagami logistics optimizing warehouse operations for 5+ business clients

Saddahaq Media

Senior Product Designer | Nov 2012 – Jul 2013

- Led design strategy and design system execution for media content platform serving 100k daily users

EDUCATION

Indian Institute of Technology (IIT) Madras, India

Dual Degree, Engineering Design
